Re: MARTINS FERRY PLANT

YORKVILLE PLANT

RECLASSIFICATION OF WASTEWATER TREATMENT SLUDGES

Dear Mr. Moschell:

The concerns expressed in your letter of June 30, 1983 relative to our earlier request to reclassify as non-hazardous wastes the wastewater treatment sludges from our Martins Ferry and Yorkville Plants are recognized.

In reevaluating our relative positions on this matter, we have decided to petition for exclusion of these two wastes from regulation as hazardous wastes. Attached are two copies of our petitions for the reclassification of each waste. Earlier you indicated you would forward a copy of our petitions to the USEPA for their information and review. We appreciate this added service.

During your review of these petitions, if you should have any questions or need additional information, please contact me.

Very truly yours,

W. R. Samples

Manager - Environmental Control
